25th Anniversary

PRODUCTION sale

NEW SALE DATE & LOCATION

Monday
FEB 28, 2022

STOCKMEN'S EAST | DICKINSON, ND
1:00 PM (MST)

GENERAL INFORMATION

SALE LOCATION:

Stockmen's Livestock - East Barn
Dickinson, ND | 701-225-8156

SALE DAY PHONE:

701-225-8156
701-260-2579 (Rusty) | 701-260-8277 (Arthur)

PRE-SALE INSPECTION:

Bulls can be viewed at Ridl Farms any time prior to February 26th and at Stockmen's Livestock through sale day.

HEALTH:

All bulls have been given 7 way Somnus, foot rot vaccine, Pinkeye vaccine, and Vista 5 and poured. Health papers will be furnished for bulls going out of state. Bulls will be semen tested in March prior to delivery or pickup and sell fully guaranteed.

SEMEN INTEREST:

Ridl Angus has the right to retain 1/3 semen interest in any bulls sold.

GENETIC DEFECTS:

All bulls selling are free of any known genetic defects by pedigree or test with the exception of Lot 11, who is an NH carrier.

MAIL BIDS:

Anyone unable to attend the sale may call or send bids to any of the owners, ringmen, auctioneer or new this year bid online at www.dvauction.com

DELIVERY:

Haul your bull home sale day and receive a 75\$ per head discount. Ridl Angus will offer free delivery on bulls within 300 miles from the farm and delivery will take place promptly after the sale. Unless other arrangements are made.

LUNCH:

FREE BEEF LUNCH STARTS AT 12:00

BREEDING GUARANTEE

A 60-day breeding season guarantee will be offered on any bulls selling over \$3000 or more. This will cover any injury that would keep them from being a breeder for the first season. This does not cover injury that occurs prior to breeding season at Ridl Angus or at the purchaser's ranch. If a problem occurs, we will provide a suitable replacement if one is available or you will receive full credit, minus \$2000, towards a purchase in next year's sale. This guarantee does not cover death as death is insurable. Injury or death prior to delivery or pickup is not the responsibility of Ridl Angus, also insurable. All bulls will pass a breeding soundness exam performed by a veterinarian. Bulls are guaranteed to be sound breeders.

FEEDING ARRANGEMENTS:

We will "feed 'em till you need 'em" at no extra cost. Bulls returning to Ridl Farms for wintering will be handled and cared for as if they were our own but are the property of the buyer with the buyer taking all risk and responsibility promptly after the sale. Ridl Angus will not be responsible for bulls if injury occurs. Injury is an insurable risk and Ridl Angus will not be held responsible for any injury. We highly suggest insuring all bulls. Bulls wintered at Ridl Farms are to be picked up at the farm. Please call ahead to make loading arrangements.

TERMS:

Bulls sell under the terms and conditions of the American Angus Association. Terms are available at www.angus.org

RIDL **ANGUS** **DICKINSON, ND**

Arthur and Cindi Ridl

Cattlemen:

It is our pleasure to welcome you to our 25th annual production sale. We would like to thank our past customers for their support over the years. **NEW SALE DATE AND LOCATION**, the sale will be held Monday February 28th at Stockmens livestock in Dickinson ND starting at 1:00 MDT We will offer 80 yearling angus bulls and 6 registered open heifers. The sale will be broadcast live on **DVAUCTION.COM** to view videos and live bidding in case you cannot attend the sale.

It is our goal to produce good, high volume, growthy cattle with high maternal traits and good dispositions. I feel the quality of this offering is as deep with quality as it has ever been. The bulls are freeze branded, fully guaranteed, will pass a breeding soundness exam in March, most have DNA enhance epds, and we are happy to continue to offer our free "fed um tell you need um" program, this may help some with short feed supply. We are excited to offer 6 registered yearling heifers. We felt our replacement pen is deep enough to offer some heifers right from the heart of the program. We are confident these heifers will perform.

**Rusty, Alysha, Emaly
and Betty Jo Ridl**

Feel free to stop out at the farm and go through the bulls or heifers anytime until Saturday February 26th and Stockmens thereafter. We thank you for your interest and look forward to working with you. Check out our website at www.ridlangus.com and www.dvauction.com for videos and updates.

Thank You
Ridl Angus
Arthur and Cindi Ridl

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

- Roughrider just keeps getting it done. Put up against some of the best AI sires in the breed and his calves perform just as good or better. They are heavy at weaning and yearling and do it with a herd bull look. His daughters are doing a fantastic job as well his first daughters have average nursing ratio of 102.

RIDL Registered Heifers

We have decide our replacement heifer pen is deep enough to offer some registered heifers for sale. In doing this we decided to take half a dozen heifers right from the top. These heifers are out of very productive cows that are sound structurally and have good dispositions. We want to offer heifers that will go out and do a great job for their new owners. The heifers are all sired by AI sires. The heifers are bangs vaccinated, freeze branded, and are guaranteed breeders.
